

# The Power of Inclusive Education and Empowering Teachers

# Ahmed Abdirahman

CEO & Founder, Järvaveckan

Obama Leader

European David Rockefeller Fellows of the Trilateral Commission

Honorary prize reciever, Raoul Wallenberg Academy

- I migrated from a civil war in Mogadishu, **Somalia**, to one of the most peaceful countries in the world - Stockholm, **Sweden**.
- Overnight!
- No formal education.

- 60 vulnerable areas in Sweden
- 500 000 citizens
- The majority are born abroad, primarily from regions outside of Europe, predominantly the Middle East and North Africa.
- The average income is 40 percent lower than the rest of Stockholm City.
- 42% of under age 25 (Rinkeby-Tensta district).
- In Stockholm City as a whole, 58 percent of the residents earn more than 26,700 kronor per month. In Rinkeby, only 14 percent of the residents earn above that amount.

**Teacher's favorite and boys in the suburb?  
What problems do you want to solve when you grow up?**

**Who am I? What is my purpose? What does it mean to be a Muslim, Black, African, Somali, or Swedish? Where is home?**

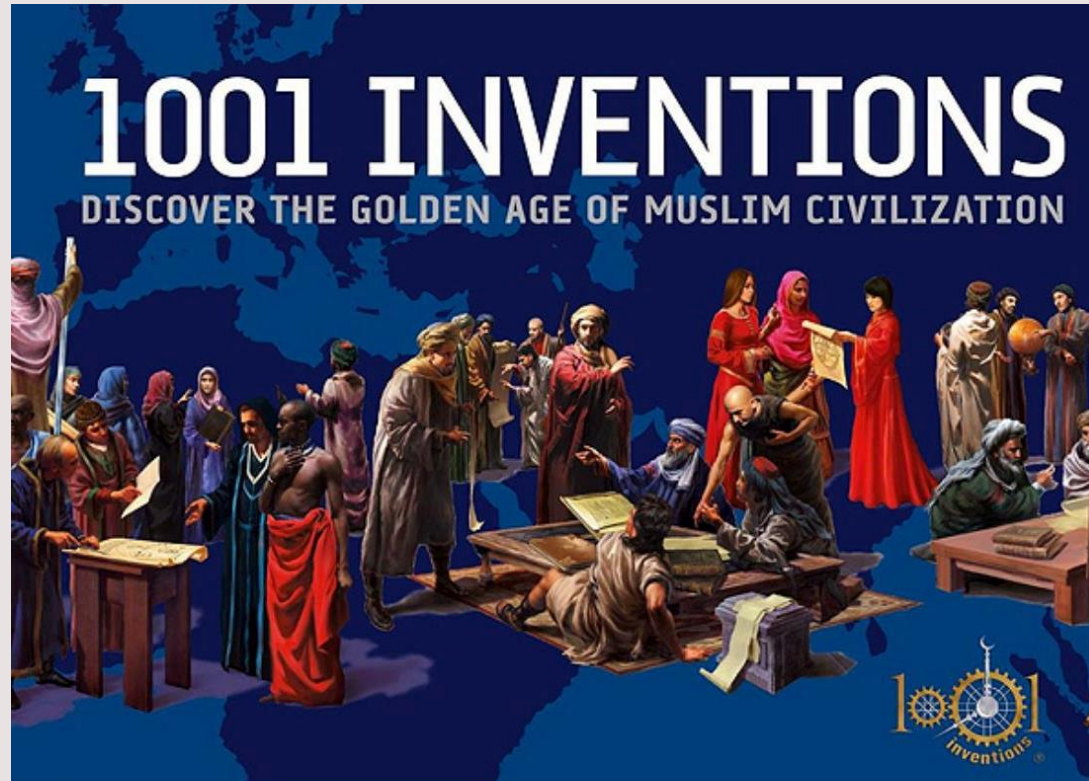

**Cultural history is at the core of  
the Ross School curriculum**

A classroom scene set in a library. A teacher, a woman with curly hair wearing a dark blue jacket and a patterned scarf, stands in the center, holding a book and addressing a group of students. The students, both men and women, are seated around a large wooden table, focused on their work. Some are reading books, while others are looking at papers or laptops. The background features tall wooden bookshelves filled with books, a large mural of a woman in traditional Chinese attire, and a window on the left side. The overall atmosphere is one of quiet, focused learning.

**The Ross approach to education is holistic and global in emphasis.**

**1001 inventions** "House of Wisdom" Canvas: Scholars from all over the Muslim civilisation worked at the House of Wisdom in Baghdad. The illustration depicts scholars, both male and female and of many faiths, who came to study and research in Baghdad powerhouse.

- **Al Kwarizmi** is a renowned Muslim mathematician, often referred to as the father of Algebra. He established the foundations of algebra and developed methods to tackle intricate mathematical issues like square roots and complex fractions.
- Another notable Islamic figure is **Ibnul Hairhum**, famous for his work on Optics. His work, addressing 50 optical questions from the Franks, was translated into numerous languages.
- Muslim scholars significantly influenced Chemistry. **Jabir ibn-Hayyan**, one of the most esteemed Muslim chemists, is often associated with the introduction of the 'scientific method'. Many terms in modern Chemistry, such as alcohol, alembic, alkali, and elixir, originate from Islamic terminology.
- In the field of medicine, Muslims made significant contributions as well. **Al Rhazes**, a leading Muslim doctor, identified the origin of smallpox and demonstrated that a person could only contract it once, highlighting the existence and function of the immune system. A pioneer in various medical fields, Al Rhazes is recognized as an early advocate of experimental medicine and is deemed the father of pediatrics, as well as a forerunner in neurosurgery and ophthalmology.

- What problems do you want to solve when you grow up?
- Thanks to my mentors and teachers, I discovered that I am a global citizen with responsibilities. My global responsibility begins in my local community and home – Sweden.
- That's why I returned to Sweden and discovered my purpose – dismantling segregation by including all people socially, economically, and politically.
- The Global Village Foundation was born and its program Järvaveckan.
